Asus Pc Link For Mac

You can make all of your displays mirror each other, or extend your workspace with different apps and windows on each display. If you use an external display with your Mac notebook, you can also use closed-display mode.
Check your requirements

- ASUS PC Link lets you mirror your mobile device on your PC. It also allows you to control your Android device from your PC with the mouse and keyboard. The program comes with an intuitive and easy-to-use interface. Just connect your mobile device and your computer.
- 【Remote control for your PC】 ASUS Remote Link turns your Android mobile phone or tablet into a WiFi or Bluetooth remote control for your PC. Including a touchpad remote, a keyboard remote, a presentation remote, a media remote and more. 【Touchpad with multi-touch gestures】 Touchpad remote turns your Android device into a wireless touchpad of PC which supports proper touch pad functions.
- Check the ports on your Mac to find out whether you need an adapter.
- Check how many displays your Mac supports: Choose Apple menu ⚹ > About This Mac, click Support, then click Specifications. On the webpage that appears, the number of displays your Mac supports appears under Video Support.

Use extended desktop mode

Connect the ASUS Zenfone 4 to a Mac or a wireless PC If you do not have a USB cable on you or if you just need to connect the ASUS Zenfone 4 wireless, realize that there is a good little program which could accomplish all this.

Maximize your workspace with extended desktop mode, which lets you enjoy full-screen apps and windows on each monitor. Then, use Mission Control to organize apps and windows across your displays. If your Dock is on the bottom of your screen, it appears on any of your displays when you move your pointer to the bottom edge of your display.

Turn on extended desktop mode

1. Make sure that your external display is turned on and connected to your Mac.
2. Choose Apple menu ⚹ > System Preferences, then click Displays.
3. Click the Arrangement tab.
4. Make sure that the Mirror Displays checkbox isn't selected.

Arrange your displays or change your primary display
Download Asus Pc Link For Mac

So that you can move apps and windows across your displays in one continuous motion, arrange your displays to match the setup on your desk. You can also change your primary display, which is where your desktop icons and app windows first appear.

1. Choose Apple menu ⚹ > System Preferences, then click Displays.
2. Click the Arrangement tab.
3. To change the position of a display, drag it to the desired position. A red border appears around the display as it's moved.
4. To set a different display as the primary display, drag the menu bar to the other display.
Use video mirroring

With video mirroring, all of your displays show the same apps and windows.

Turn on video mirroring

1. Make sure that your external display is turned on and connected to your Mac.
2. Choose Apple menu ⚹ > System Preferences, click Displays, then click the Arrangement tab.
3. Make sure that the Mirror Displays checkbox is selected.

Use AirPlay

With Apple TV, you can mirror the entire display of your Mac to your TV, or use your TV as a separate display. To turn on AirPlay, follow these steps:

1. Make sure that your TV is turned on.
2. Choose in the menu bar, then choose your Apple TV. If an AirPlay passcode appears on your TV screen, enter the passcode on your Mac.
3. Mirror your display or use your TV as a separate display:
   - To mirror your display, choose , then choose Mirror Built-in Display.
   - To use your TV as a separate display, choose , then choose Use As Separate Display.
4. To turn off AirPlay, choose , then choose Turn AirPlay Off.

If you don't see in the menu bar, choose Apple menu ⚹ > System Preferences, click Displays, then select the 'Show mirroring options in the menu bar when available' checkbox.
